

CHINA INTERCITY RAIL SUMMIT 2006

1. Kernex Microsystems (India) Limited is taking part in “China Intercity Rail Summit 2006” being held from 7 to 8 of September, 2006 at Shanghai Grand Hyatt Hotel, Shanghai, China, which is the China’s largest event dedicated to Intercity rail. It provides a unique opportunity for rail operators to meet and discuss the business opportunities of intercity rail industry. It is a potential opportunity to KMIL to showcase Networked ACD system for the vast China Market as well as the other Railway operators in the region.
2. KMIL will demonstrate the functioning of ACDs in the exhibition in addition to addressing a conference of Railway operators during the event, under the theme “HiTech solutions for International Railways”.
3. Participation in the event will be immensely beneficial to KMIL to showcase the several attributes of ACDs and position it as a Global Railway safety Product for medium and low density national routes.
