

LATEST UPDATE ON LxCS PROJECT FOR EGYPTIAN NATIONAL RAILWAYS

Date: 27th July 2010

The following is an update on the latest developments in the LxCS project for Egyptian National Railways (ENR):

1. Site Acceptance Test (SAT) for the electrical interlocked gate at El Gaz was conducted by ENR officials and was declared successful on 12th April 2010.
2. On 14th July 2010, ENR officials conducted Site acceptance test on the mechanical interlocked gate at Telkha. The tests were conducted for about 2 days and declared a success.
3. A Five member factory acceptance test team from Cairo comprising of ENR officials, Cairo University professors (consultants to ENR) visited our HQ at Hyderabad and our suppliers in New Delhi from 17th to 24st July 2010 to conduct Factory Acceptance Test (FAT) on the Electrical LxCS equipment being supplied to them. All factory acceptance tests for 43 gate sets were successfully completed and accepted by ENR.
4. FAT for mechanical LxCS is expected to begin during the last week of September 2010.
