

IT Training @ Kernex

Flexible, Detail-Oriented and Passionate

@ KERNEX, WE believe that training is a highly effective way of **developing staff** and by speeding up the development of employee skills, productivity, morale and commitment and when delivered effectively, it makes organizations more profitable and easier to manage.

However, everyone's needs are different, and this means that when you choose your training provider, you must be sure that they can provide the flexibility and quality of service that meets your requirements.

Kernex Microsystems is a modern and dynamic organization offering Corporate trainings to companies throughout India. We provide a unique blend of consultancy and hands-on training providing you with the productive skills to improve your performance.

We are a corporate training firm present in Hyderabad, India. We have provided corporate trainings across INDIA and globally including Bangalore, Chennai, Guwahati, Cairo Egypt, and SanJose USA

Our panel has experienced, committed trainers & free-lancers having relevant industry experience to conduct standard & custom made training programs.

We have been training since 1995 and after seventeen years of delivering high quality business training, we have developed a formula that works – for us and our growing list of business clients.

The training program has been developed over a number of years and our trainers are very experienced. We strive to make training programs interesting, relevant and above all beneficial to the trainee. No matter what your role in your organization, if you can learn the techniques, features and functions to help you do your job better. By completing a training course, you will become more proficient in the product, which will allow you to increase your return on investment.

Kernex Microsystems offers detailed software training programmes for all your core IT application needs. Designed for both end users and developers, with skill levels ranging from beginner to advanced, courses are offered at training centers. Our Trainers can also customise and tailor programs to meet specific training needs or requirements.

Advantages of Training

Did you know that the learning curve on new software can have an initial net loss on productivity of up to 25 percent?

Technical education helps realize a higher return on your investment. Typically, when you first get new software, your productivity drops up to 25%—meaning it takes one and a quarter times as long to do a task then it did before you got the new software.

Your urgent deadlines and multiple projects won't wait while you try to learn important commands and features of your new software. Guessing how to use new features and searching through manuals is slow and frustrating.

With professional development, you will reduce the time spent learning and quickly reach a higher level of productivity—self-taught users may never reach this level.

Technical education...

- Guarantees the most powerful features are used.
- Helps speed up your learning curve.
- Helps both you and your company be more competitive.

Is technical training worth the investment? Did you know that...

- In-house training costs almost 75% more than outsourced training
- Just a 2% increase in productivity has been shown to net a 100% ROI in outsourced, expert-led training
- Companies that invest in employee training experience substantially higher income and gross profit margins
- Professional development enhances employee retention

TRAINING COURSES

To help you win that dream job, perform better or earn a promotion at work

IT careers can open doors to a range of roles in a variety of industries. With businesses increasingly reliant on skilled IT professionals, there is no better time to get qualified. The demand for developers has grown at the same phenomenal rate in IT in general.

Programmers write and maintain software, often with expertise in specific languages (eg Java, .Net). Adaptability and the **desire to continue learning** new methodologies are hallmarks of a great software engineer and the cornerstone of a successful future.

Whether you're looking to begin your career in the IT field or gain specialist skills and build a solid understanding of IT practices within a variety of business environments, we've got a specialist course to suit you. From database development to technical support, security and web development, we have successfully & repeatedly conducted trainings in following technologies:

Operating Systems and System administration	Microsoft: Windows Server 2003/2008/2010/2012 R2, Windows 7, Windows 8. UNIX: Solaris; SCO OpenServer; AIX; HP/UX Linux: Red Hat Enterprise; SUSE Enterprise; Caldera; SlackWare; Corel, and few other clones
Web	Java , Java Scripts , JSP , JDBC, JDK, EJB
Programming Languages	Java, C, C++, C#, ASP, VB Script, .NET, Visual Basic, VC++
Databases	MS-SQL(2000-2008) , Oracle(9i,10g,11g), MS-Access
Networking	SNMP, TCP/IP
ERP & CRM	Oracle Applications (Financials and Manufacturing)
Testing Tools	Software Testing Concepts. Tools such as Silk, Win Runner, Load Runner, Test Director, SQA, IDE Case Tools, UML, Rational Suite

Our Instructors

Hands-on, dedicated and professional

Our technical trainers are highly-skilled professionals who possess a valuable combination of real-world experience and product expertise.

Our instructors provide real-world experience and the strongest technical expertise in the industry, along with proven problem-solving skills. Our technical trainers maintain software certifications, attend thousands of hours in training themselves annually, and have the resources available to answer questions and provide solutions to your toughest design problems.

They continually review the latest advancements in technology and apply that knowledge to your real world applications. Our specialists are acknowledged by the IT industry for their skills and knowledge of software implementation.

Web based Online Training

Busy schedules are forcing people to find creative ways to save time. Budget cuts are driving managers to impose cost cutting measures. Online web based training classes offer you the ability to receive high quality, expert led training that is interactive, convenient and affordable.

Benefits of Taking Online Training include:

Cost Savings and Convenience

- Cut down on travel expenses
- Reduce time away from the office
- Connect from anywhere. Learn from home, work or on the road
- Half day sessions allow you to be productive. Balance time spent learning with time spent working
- Work at your own pace. Take time to practice what you have learned, spend more time on challenging areas without slowing others down

Communicate

- Smaller class size helps facilitate questions and exchange of ideas
- Interact with other classmates online
- High quality, interactive content

Dedicated and Custom Training

Empowering to Perform

Do you have a Need for a training program geared to your specific needs? Our custom-designed courses focus on client-specific content so you can increase staff efficiency, save time, and have better tool use. Our training can be customized in a variety of ways to suit your specific needs.

Dedicated Classes

Dedicated classes can provide significant savings and can be held at your location or any of our office locations. We also offer a multi-person discount on to help increase the productivity of your entire department.

Custom Classes

If your organization has special training needs, we can customize a class just for you. We'll work with you to understand exactly what you need to optimize your training investment.

We have helped several companies improve their business process and implement new software to become more productive. You learn from our experts while you complete your project. It's that easy.

Why Choose KERNEX ?

Small Classes

With small class sizes, everyone receives proper attention and comes away with a full understanding of the subject matter covered on the course. If you've ever attended a course in a room packed with delegates, and left with maybe a fraction of what you thought you'd learn, you'll know exactly what we mean.

Friendly and Attentive People

Whether it's booking a single person on to a scheduled public course, or putting together a complete training programme, we will listen to your needs and provide training accordingly.

Flexible and Helpful Service

Modern training requirements demand a consultative, sometimes informal, approach, and we recognise how essential it is that you have a flexible training provider with a range of options from which your solution can be selected.

Competitive Pricing

You will see that our prices are extremely competitive, and if you find lower, you may wonder whether the quality of trainers, service and personal attention are adequate.

We prefer to see our role as getting the best return for your investment : in helping you to make the most of your budget.

Assured Quality

Our quality accreditations demonstrate how we have invested in, and continue to maintain, recognised quality systems in our operation and our delivery of training.

Super Trainers

We operate a mix of in-house trainers and associates, giving us the ability to assign exactly the right trainer to your course. Every one is experienced from both training and real world viewpoints.
